4.0. First Aid Measures

4.1 Description of first aid measures

General advice

Compliance with the rules of good industrial hygiene is recommended.

Inhalation

If large amounts of dust are inhaled, remove exposed person to fresh air, keep warm and at rest. If breathing problems occur administer oxygen or CPR. Seek immediate medical attention.

Ingestion

Wash out mouth with water.

Get medical attention if adverse health effects persist or are severe.

Skin contact

Wash skin immediately with soap and water. Get medical attention if irritation develops and persists.

Eye contact

Immediately flush eyes with plenty of water.

If eye irritation persists, consult a specialist.

4.2 Most important symptoms and effects, both acute and delayed

None reported.

4.3 Indications of any immediate medical attention and special treatment needed

Notes to physician

No specific treatment.

5. Fire-Fighting measures

5.1 Extinguishing media

Suitable

Not combustible. Use water spray, fog or foam, carbon dioxide. Use an extinguishing agent suitable for the surrounding fire

Not suitable

None reported.

5.2 Special hazards arising from the substance or mixture

In a fire or if heated, a pressure increase may occur. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products

In combustion may emit toxic fumes.

5.3 Advice for firefighters

Special precautions for fire-fighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin, eyes and clothing.
Prevent formation of dust if possible. Respiratory equipment should be worn if dust created.
Provide adequate ventilation.

6.2 Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

6.3 Methods and material for containment and cleaning up

Avoid dry sweeping, dust creation and wind dispersal.
Collect powder using a special dust vacuum cleaner with particle filter.
Transfer to a suitable labelled container for disposal according to local regulations.
If a vacuum system is not available only wet clean up methods should be used.

6.4 Reference to other sections

Note: see SECTION 1 for emergency contact information, SECTION 8 for personal protection and section 13 for waste disposal.

7. Handling and storage

7.1 Precaution for safe handling

Avoid contact with skin, eyes and clothing. Avoid dust generation.
Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking.
The use of engineering measures such as local dust extraction is recommended to provide effective dust control in order to ensure compliance with the current Occupational Exposure Limits.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.
Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use.
Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

7.3 Specific end use(s)

For use as a growing media additive for use in horticulture.

8. Exposure controls/personal protection

8.1 Control Parameters

Workplace exposure Limits as defined by UK HSE in document EH40/2005 where available:

Substance	CAS number	Workplace Exposure Limit		Comments
		Long-term exposure limit (8-hr TWA reference period)	Short-term exposure limit (15 minute reference period)

8.2 Exposure controls

General

Avoid contact with skin, eyes and clothing.

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Ensure that there is sufficient ventilation of the area.

Eye and face protection

Wear tightly fitting safety goggles and Face shield that meet EN 166 a/o ANSI Z87.1 standards

Skin protection

When handling wear gloves.

Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact.

Inhalation

In cases of prolonged exposure to airborne dust concentrations, wear respiratory protective equipment that complies with European or national legislation i.e. Type FFP2.
